BLOCKSIZE

LOW-LATENCY FINANCIAL DATA POWERING DEFI

BLOCKSIZE provides low-latency, high-quality market data across asset classes with a focus on DeFi crypto pairs. Thereby we support Decentralized Oracle Networks (DONs), fellow node operators and institutional clients from traditional finance. The BLOCKSIZE price feeds span a broad variety of asset classes, ensuring smooth integration between traditional finance and DeFi ecosystems. BLOCKSIZE offers SLAs and multiple delivery mechanisms, such as WebSocket, REST, file transfer, and email.

- crypto prices with full transparency
- sophisticated outlier detection
- highest compliance standards
- highest operation standards

- real-time price feeds
- interval and daily data
- order book and trade data
- VWAP, median, best bid/ask

BLOCKSIZE has a proven track record supporting key DeFi blockchain ecosystems and institutional clients. BLOCKSIZE with its experienced tech and business experts brings German excellence in engineering, compliance, and stability to the DeFi world.
